MAHA
SCHOOL OF MASSAGE THERAPY

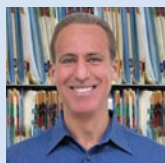

The debilitating effects of both pain and limited movement of the upper extremity has an impact on an exceedingly large percentage of the population. Today's jobs often require specialized repetitive tasks which can result in pain and limited range of motion. Developing a sound understanding of the upper extremity's structure and function is clinically important. You will find this seminar enjoyable and practi-

UPPER EXTREMITY A CALL TO ARMS

cal, as you develop skills to treat numerous conditions most commonly encountered in daily practice, from thoracic outlet syndrome to carpal tunnel syndrome and many more. You will learn about orthopedic tests that allow you to determine precise, efficient and effective treatment plans for your clients' specific problem. The seminar follows the musculature influencing the scapula and humerus then progresses to the forearm, wrist and hand. There are a number of sites where muscles entrap nerves and you will learn the techniques to eliminate pain and dysfunction in these areas. This entertaining and hands-on seminar is a must and the techniques will be used by you immediately.

This seminar also address: Frozen Shoulder, Thoracic Outlet Syndrome, Carpal Tunnel Syndrome, Rotator Cuffs Injuries, Cubital Tunnel Syndrome, Lateral and Medial Epicondylitis, Repetitive Strain Injury (RSI)

David Kent, LMT, NCTMB, is a writer, educator and international lecturer specializing in dissection, medical massage and practice building seminars.

David founder and president of Kent Health Systems, is a product innovator and has developed the Postural Analysis Grid Chart, Trigger Point and Muscle Movement Charts, Personalized Essential Office Forms and DVD Programs. His clinic Muscular Pain Relief Center employs numerous therapists and receives referrals from area hospitals and various medical specialists. David's cutting-edge images and software add excitement to his dynamic teaching style. Learn more call:
